

Delegation Name: Plurinational State of Bolivia

Ambassador Name: Arda GÖKÇEK

Honorable TIMUN assembly, distinguished chairs, valued admins, and fellow delegates,

The Delegation of Plurinational State of Bolivia realizes the importance of implementing improvements to digital labor and so brings benefits to all.

Our State believes that two elements: traditional industries and digital labor, can work hand-in-hand more efficiently than ever, with remarkable economic results. Briefly, our Delegation believes that the transition and generalization of automation for economical purposes is a vital need.

Already in 2024 a global figure 74% of businesses use automation in order to drive efficiency and navigate the conflicts our world is currently facing: such as the negative impacts of ongoing wars and continuously raging inflation. Increasingly complex regulations on prices have negative consequences on developing, and undeveloped nations nonetheless. Bolivia believes that continually embracing developments in digital labor will be extremely beneficial for all, increasing flexibility for individuals, reducing costs for both workers and employers, and ultimately increasing (diversity numbers) in job opportunities.

Thank you.
