

Delegation Name: The Socialist Republic of Vietnam

Ambassador Name: Zehra Savaşkan

Honorable Presidency, Esteemed Delegates, Ladies and Gentlemen,

A vibrant nation with a population of over 96 million , The Socialist Republic of Vietnam is a country built on the **hard work** and **determination** of its people, renowned for its rich cultural heritage, strong history and dynamic economic growth.

As a country with a rich traditional industrial history, Vietnam recognizes the **profound impact** that technological advancements and automation have on the lives of millions of workers, not only within our borders but globally.

The economic growth of many countries, such as Vietnam, was based on sectors such as agriculture and manufacturing, but the transition to the digital economy creates many problems. Emerging technologies pose **risks** such as displacing workers and deepening inequality. Vietnam advocates for **innovation** that supports workers, maintains economic stability and social harmony.

Vietnam is advancing digital transformation through the **National Digital Transformation Program** and the **National Technology Innovation Program**, which aim to expand internet access, improve services, and boost the digital economy. At the same time are supporting our traditional industries by providing them with digital tools, training and modern technology to improve productivity and sustainability. These efforts ensure that both new and traditional sectors grow together in a balanced, inclusive way.

At this conference Vietnam will **advocate** and **propose** solutions on a variety of issues such as addressing the threat posed by biological weapons, ensuring digital tools are accessible and useful for historically marginalized populations and curtailing worker poverty in South America.

Together we can achieve a brighter future with the contribution of advancements in a more united world. Thank you.
