

Delegation Name: Switzerland

Ambassador Name: Maya Kontente

Dear delegates, Student Officers, Advisors, and the Executive Committee of the Turkish International Model United Nations,

I would like to start this speech by emphasizing the **exceptional** honor it is to be the ambassador for the delegation of Switzerland in TIMUN

The topic of “ Uncertain Future of Traditional Industries: Labor in the Digital Economy” is a controversial topic to debate on. Due to the fact that digital transformation is reshaping traditional industries and workplaces. The adoption of technologies like artificial intelligence, robotics, and digital platforms is increasing efficiency, but displacing traditional jobs, creating uncertainty for workers in sectors such as manufacturing, retail, transportation, engineering. These developments in industries will affect our development also while destroying job opportunities for people in the future. It is **impossible** to undo this development in technology and innovation as it is mandatory for human and world development.

As a **respected** country in the UN our aim is to balance innovation with tradition, and sustaining current job opportunities as well as encouraging new ones. We seek to enhance productivity while preserving cultural importance. We prioritize lifelong education to ensure workers are ready to **thrive** in the upcoming digital age.

We as the delegation of Switzerland declare that we are **prepared** and **eager** to collaborate with our fellow nations. Not only maintaining current ideas but also opening ourselves to new projects made to ensure the wellness of our world in a time where conflict is just around the corner.

As the delegation of Switzerland, Since the beginning, achieving both **national** and **worldwide** peace has been our constant objective. We hope that throughout this conference, we will be able to help achieve this goal.
