

Delegation Name: Republic of Korea

Ambassador Name: Eylül Kansız

Honourable delegates, student officers and executive team of the Turkish International Model United Nations, as the ambassador of the Republic of Korea, I am **honoured** to represent my country at the 2024 conference.

The Republic of Korea is a global champion of **democracy and liberty** in a world and region with increasing rates of authoritarian leadership. We believe that movements towards the **non-proliferation** of nuclear, biological and chemical weaponry should be encouraged, being a state that is especially threatened by **regional nuclear powers**. Therefore, we recognise and reserve the right to safely and securely implement digital technologies, especially artificial intelligence, into defence systems.

Responsible use can be ensured by establishing **frameworks** on the ethical and equitable **implementation** of these technologies, as they can greatly promote democratic and fair values in many varying fields, such as in **governmental and legal proceedings**, or meeting the **United Nations Sustainable Development Goals**, as we are committed to promoting global economic development, whether that be in Latin America or regionally.

As the Republic of Korea, we urge development to take place diplomatically and democratically, especially through **international organisations** and international cooperation, and hope, that by the end of this year's conference, all delegations can come together with a shared goal of **promoting peace and development** across borders. Thank you.
