

Delegation Name: Algeria

Ambassador Name: Oğuz Işık

Dear delegates, Student Officers, Advisors, and the Executive Committee of the Turkish International Model United Nations,

I would like to begin this speech by saying I'm very much honored to have the privilege to be the ambassador of the delegation of Algeria in TIMUN 2024.

One of the results of the rapid development and innovation in technology over the past few decades is that traditional industries are actively being replaced by digital ones. For instance, the popularization of online shopping services is rendering physical shops less preferable. While these kinds of changes do provide a better quality of life for consumers, the service providers start facing challenges and are required to adapt. Accordingly, some industries and sectors change entirely, and this leads to some jobs becoming outright obsolete. Hence, it becomes crucial to embrace and adequately adapt to these changes on a nationwide scale in order to sustain national economic well-being and growth.

As the delegation of Algeria, we aim not only to welcome and facilitate digitalization on a national level, but also for it to thrive globally. In order to reach this common goal, we will cooperate with other nations and work together towards ensuring a safe transition from traditional industries to digital and technological industries. We fully support digital innovation while also making sure traditional industries don't face injustice, and we hope we will contribute to this objective throughout this conference.

Thank you.
